YOU WILL ALSO NEED
- 2 x Phillips (Cross) Head Screws

ASSEMBLY

CAUTION: Do not adjust the recline lever until the backrest has been securely mounted. (Step 10). Doing so may cause the backrest bracket to spring forward.

1. Remove 4 parts from the box, while taking care to avoid the backrest recline lever and backrest bracket. Check if there are any missing parts.

2. Lay the foam sheets in the packaging on a flat surface. Place the wheelbase upside-down on top of the foam and insert the 5 casters.

3. Turn the wheelbase right side up and insert the hydraulic piston. Slide the hydraulic sleeve over the piston.

4. Remove the 4 M3 screws that are pre-installed in the backrest using the Allen key.

5. Align the backrest with the bracket on the right side of the chair. Attach the backrest using the M3 screws.

6. Push the bracket on the left side towards to meet the backrest, and secure using the M3 screws. Tighten all 4 screws fully using the Allen key.

7. Attach the side covers with the Phillips screws using a Phillips (cross) head screwdriver. Take care not to over-tighten. Remove the recline stops.

8. Lift the chair and gently set it facing downward. If you are assembling an Omega or Titan, proceed to Step 9c. For Throne, skip to Step 9b.

9. a. For Throne: Attach the mult-i+ mechanism to the bottom of the seatbase using the 4 M3 screws. Ensure the mechanism is in the correct direction. Proceed to Step 9b.

   b. For Omega/Titan: Attach the full-i+ mechanism to the bottom of the seatbase using the 4 M3 screws. Ensure the mechanism is in the correct direction. Skip to step 11.

   c. For Titan only: Attach the mult-i+ mechanism to the bottom of the seatbase using the 4 M3 screws. Ensure the mechanism is in the correct direction.

10. Line up the grooves in the wheelbase with the brackets in the seatbase firmly.

11. Lift up the assembled wheelbase into the socket of the tilt mechanism.

12. Carefully lift the chair upwards while holding the wheelbase and position it upright. Congratulations! You've assembled your Secretlab chair.

USAGE

BACKREST RECLINE
- Pull the lever FULLY and lean back slowly until the backrest is vertical. Slowly return the lever to the starting position. Ensure the lever locks back in place.

4D ARMS
- Press and pull the 10 front button to adjust front, back, and angle. 2 lever side button to adjust sideways, and 5 lever on the outside of the armrest to adjust height.

TILT ADJUSTMENT
- Lift the chair and gently set it facing downward. If you are assembling an Omega or Titan, proceed to Step 9c. For Throne, skip to Step 9b.

MULTI-TILT MECHANISM
- Right lever (white): Push up to adjust height, left lever (white): Push down to unlock the tilt mechanism.

FULL-TILT MECHANISM
- Right lever (white): Push up to adjust height, Push inward/outwards to lock/unlock the tilt mechanism.

ARMREST ADJUSTMENT
- The distance between armrests can be adjusted. Loosen the M3 screws and move to the desired position, then tighten to secure.

TENSION ADJUSTMENT
- The distance between armrests can be adjusted. Loosen the M3 screws and move to the desired position, then tighten to secure.

SAFETY INFORMATION

- The recommended weight limit for 105kg (232lb) for the Throne series, 110kg (242lb) for the Omega series, and 100kg (220lb) for the Titan series. The chair should only be used normally and in a non-abusive manner. For warranty information, please visit the Warranty section on our website.
